

They all said it couldn't be done...
Astounding performance **and** domestic bliss.

"Some day all speaker systems will be like this"

Sunday Times
January 2008

Redefine the Possible – That's what we do at Q Acoustics.

Take the revolutionary NEW Q-AV Speaker System, incorporating the world's first use of high-tech 'BMR' (Balanced Mode Radiator) drivers and boasting many other 'Patent Applied For' design features. The front left, centre and right speakers are mounted onto a width and depth adjustable bracket (included), allowing them to be perfectly aligned with any (37" to 50") television. Visually, they simply become part of the television.

But don't just take our word for it...

"the easiest to accommodate surround solution we've seen"

"simple. And yet, genius".

"a genuine, style and substance alternative to the 5.1 speaker package."

What Hi-Fi? Sound and Vision, April 2008

"radical audio breakthrough"

"sounded great for movies and music alike"

The Sunday Times, January 2008

Frankly, we couldn't have put it better ourselves. Experience the unrivalled Q-AV System for yourself at your nearest Q Acoustics authorised dealer or visit www.Qacoustics.co.uk

Oh, and don't be afraid to take your partner.

The Left, Centre, Right BMR drivers align perfectly to your screen

Discrete subwoofer and rears can both be wall mounted
